

## **Green STRING Corridor**

### **- Routes to efficient and greener transport solutions in the transport corridor Öresund - Hamburg**

The aim of the special session is to present new findings and analyses as produced through the Green STRING Corridor project concerning business travel, logistics and accessibility in the STRING region\*, and operationalising visions for a greener transport corridor. The special session will focus on international transport in terms of freight transport and logistics, as well as opportunities for long-distance passenger travel in an international context. The special session also wishes to highlight and create debate around the role played by green corridors and sustainable logistics in meeting political climate goals.
