

Artificial Intelligence for pro-active safety studies

ALIAKSEI LAURESHYN | TRANSPORT & ROADS, LUND UNIVERSITY

What is pro-active
safety analysis?

Pro-active = BEFORE accidents happen

Problems with accident data

Unethical

*Let's wait for
more planes to crash...*

Problems with accident data

Unethical

Few and random

Under-reporting

Scarce/biased information

Process?

Hydén, 1987

2017-03-21 19:14:45

2017-03-22 08:13:16

SUCCESS

This isn't it.

Concept of 'severity'

Nearness-to-collision?

Consequences **IF** a collision?

BOTH? How to 'weigh' together?

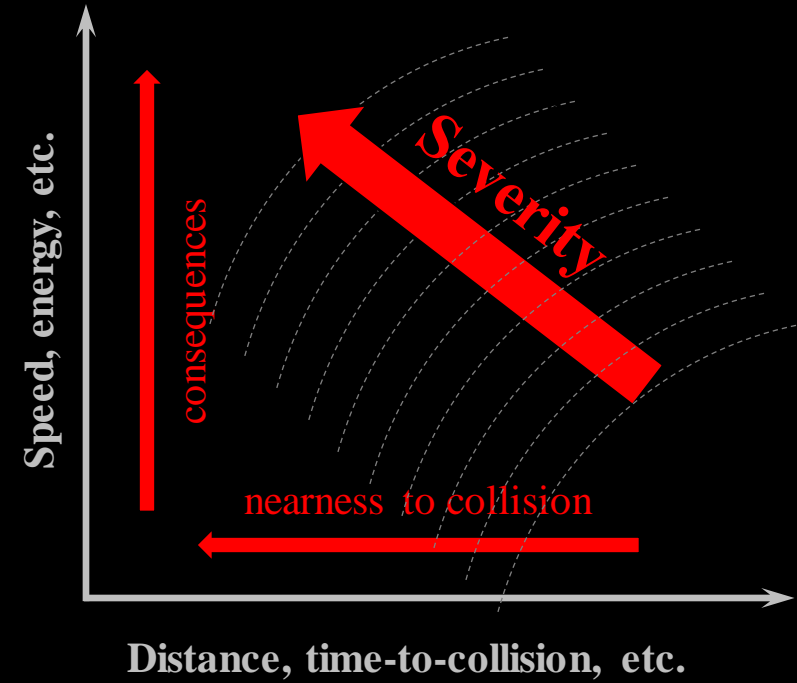

Concept of 'severity'

Nearness-to-collision?

Consequences **IF** a collision?

BOTH? How to 'weigh' together?

from Vision Zero perspective:

Nearness-to-severe injury

Frequently used indicator types

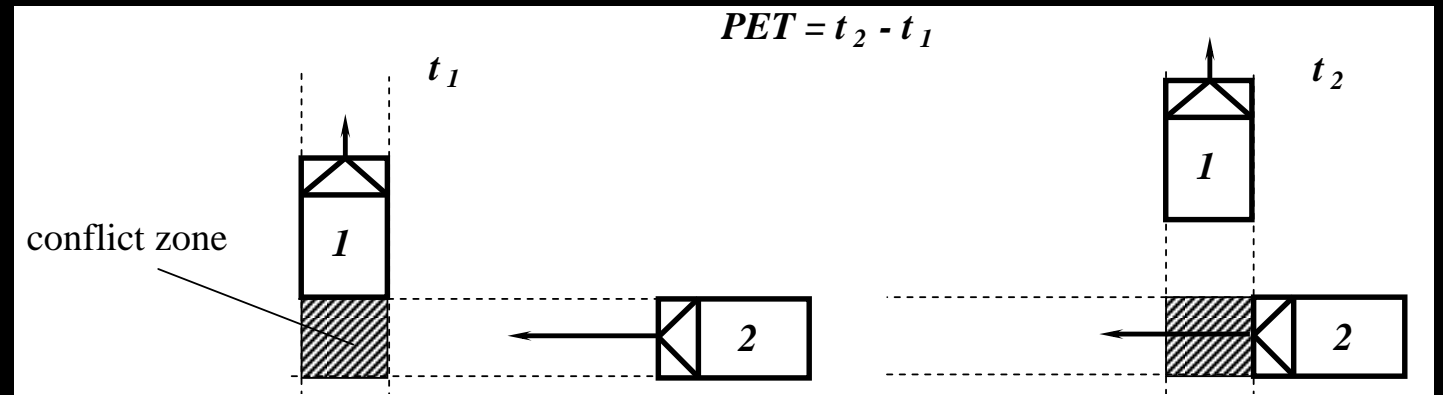

Time-to-collision (TTC)

Frequently used indicator types

Time-to-collision (TTC)

Time gap (PET)

Frequently used indicator types

Time-to-collision (TTC)

Time gap (PET)

Evasive action

Frequently used indicator types

Time-to-collision (TTC)

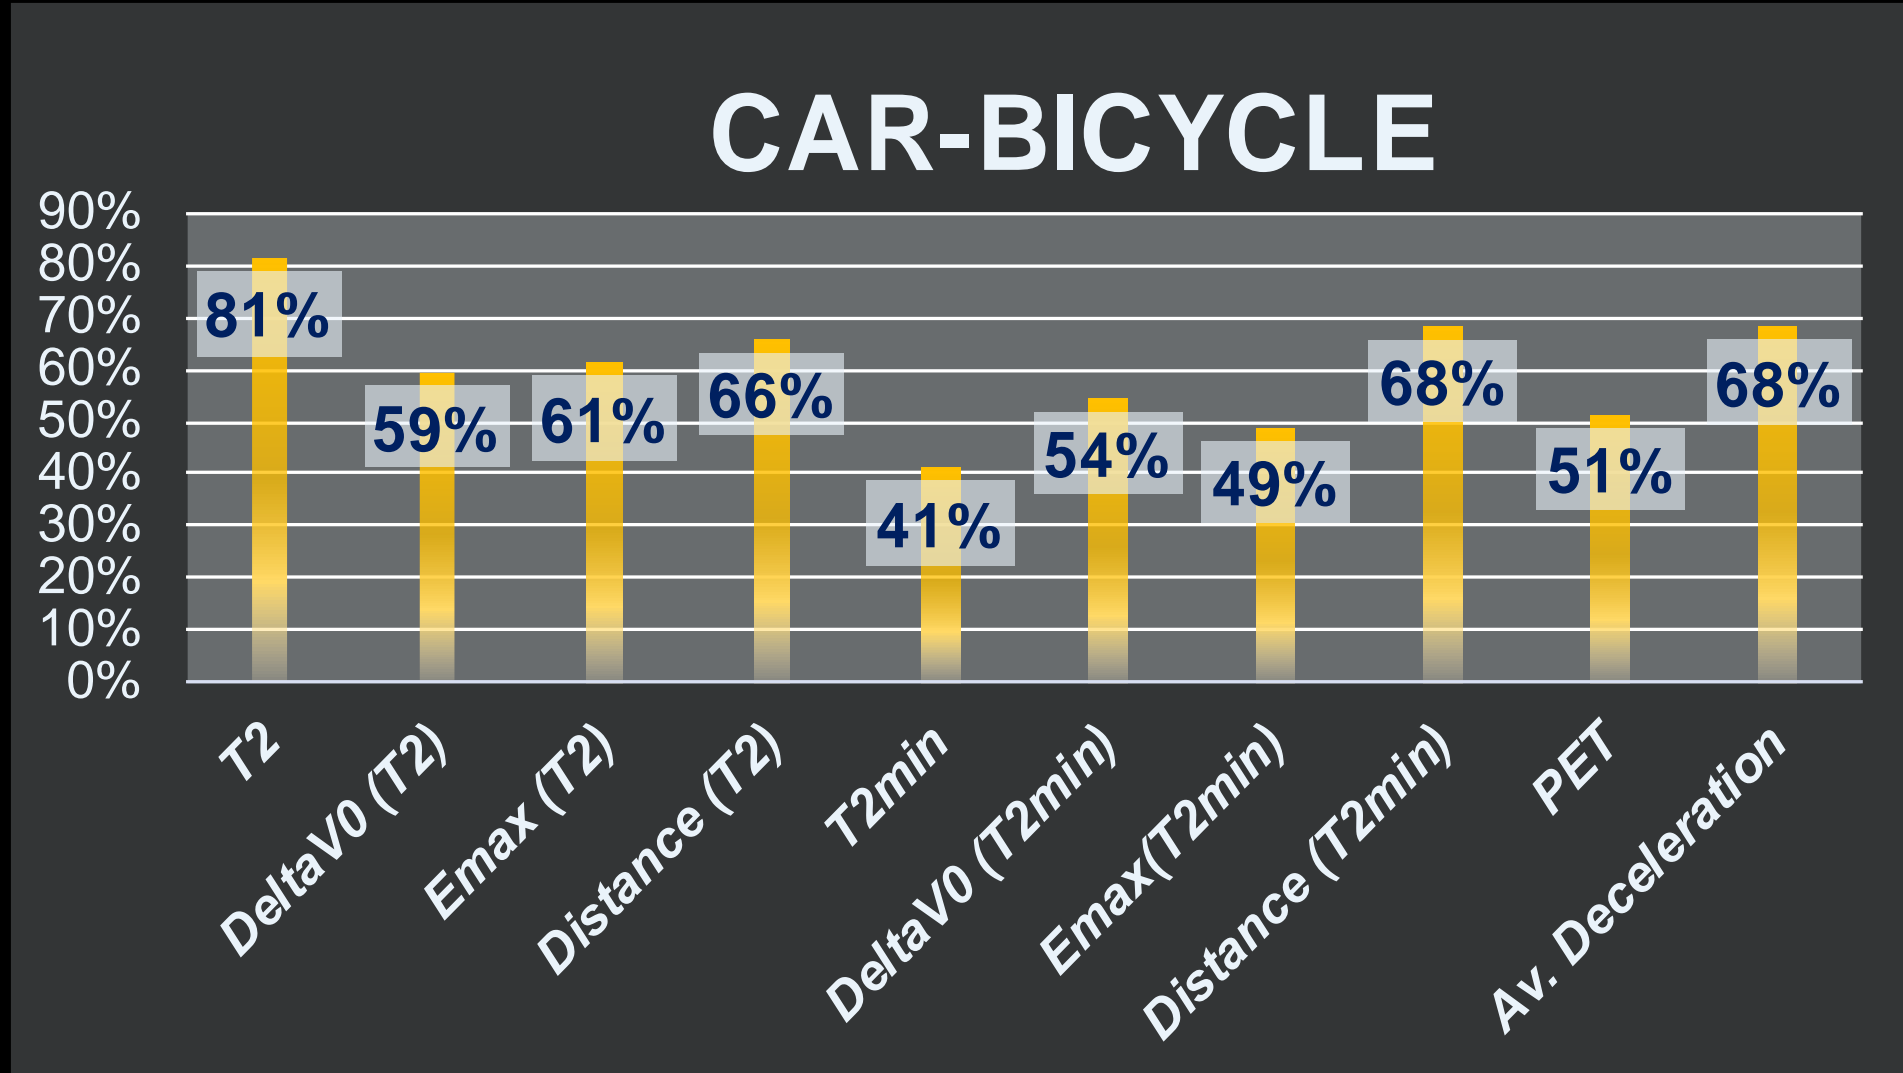

Time gap (PET)

Evasive action

Energy/momentum

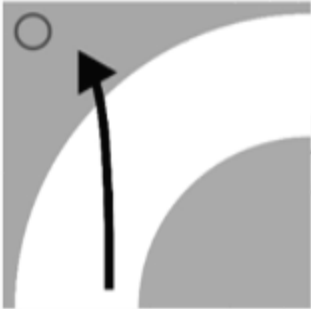

Yet, humans are much better...

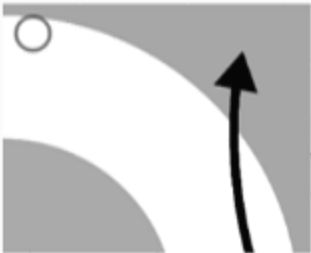

VRUMonitor App

Choose the illustration that best describes how your accident happened.

I had an accident in the left-hand side of a right bend

I had an accident in the right-hand side of a left bend

TILBAGE

FORTSÆT

A photograph showing a person riding a bicycle on a paved path. In the foreground, there are several large black mats laid out on the grass. In the background, there is a body of water and some buildings.
